Introducing the All-New KRMC-Hosted!

The new KRMC-Hosted remote management platform is a dynamic way to manage, monitor, provision and enforce strong security policies for your Defender encrypted drives. Kanguru now offers 4 different packages depending on specific security requirements, needs and budget. This new pricing structure gives customers more flexibility and convenience, enabling them to choose only the requirements they need for the most cost-effective solution.

The KRMC-Hosted BASIC account comes free with the purchase of any Defender encrypted USB device. This is a free starter account, and can be easily scaled up to any of the other tiers to meet additional objectives, security demands or budget.

Each package offers One, Two, or Three-Year Licenses for added convenience.
